

Maritime Spatial Planning (MSP) summer school for early-career professionals and PhD students Klaipeda, Lithuania | 29 Aug – 02 Sept 2016

TRANS-BOUNDARY MSP IN THE BALTIC SEA REGION: Science-based approaches to analyse and address MSP challenges

COURSE AIMS

- To provide a state-of-art update on the academic discourse on and experience of trans-boundary MSP.
- To provide insights into current trans-boundary MSP challenges and practices and opportunities in the BSR and in other European marine regions.
- To provide training and reflection on science-based tools and approaches and their potential application to address trans-boundary integration in MSP.
- To provide possibilities to expand networks with other professionals and academics engaged in MSP research and practice in the BSR and elsewhere.

COSTS

- Course participation incl. accommodation, lunches, study visits and course material is free.
- Travel costs have to be covered by course participants. Possibility to apply for a travel grant to partly cover travel costs.
